Patent Journals: An introduction

Bentham Science Publishers is an exclusive publisher of 22 online and print journals on recent patents in major therapeutic areas of drug discovery as well as biotechnology, biomedicine, nanotechnology, engineering, computer science and material science disciplines.

Publication types: Review, Research & Thematic Issue.

Journal Sample Copies

Sample Copy(s): We offer you the possibility of ordering free print sample copies or viewing free online sample copies. For information, visit www.benthamscience.com and select "Free Online Journals and Trials"

Ordering Information

- We offer great **discounts** for direct multiple subscription orders (institutional and personal), global and multi-site online licenses and consortia licenses.
- **2-Month FREE Online Journal Trial:** We currently offer institutions the possibility of gaining FREE access to all Bentham titles for a 2-month period.
- **Subscription Information:** All journals are available online. For information on the journals and how to order, please visit our web site at www.benthamscience.com and select "Prices and Ordering" or contact our subscription department.
- **Pay-Per-View:** As an alternative to subscriptions, you can access a single manuscript online. By using your credit card, instant access to the desired article including the full text and illustrations is granted. For information, visit our web site at: www.benthamdirect.org

Important to Know!

- **Abstracting Agencies:** Our journals are indexed in: Chemical Abstracts, Current Contents, MEDLINE, Biosis, Scopus and others.
- **Free Online Journals:** As a service to the scientific community, we offer all journals sample issues free online. For access information, please visit our web site at www.benthamscience.com
- **Advertisements and Marketing Exchanges:** We accept advertisements in all of our journals. Furthermore, we organize many marketing exchanges with relevant conferences. These conferences and attended conferences are highlighted on our conference site at: www.benthamscience.com/conferences and on our CD. For information, contact us at: marketing@benthamscience.org
- **Open Access:** Bentham currently offers authors the choice of publishing their articles as open access. Please refer to the journal instructions for authors for details.

RECENT PATENTS ON ANTI-CANCER DRUG DISCOVERY

publishes review and research articles, and guest edited thematic issues on recent patents in the field of anti-cancer drug discovery e.g. on novel bioactive compounds, analogs & targets. A selection of important and recent patents on anti-cancer drug discovery is also included in the journal. The journal is essential reading for all researchers involved in anti-cancer drug design and discovery. The journal also covers recent research (where patents have been registered) in fast emerging therapeutic areas/targets & therapeutic agents related to anti-cancer drug discovery.

Impact Factor: 2.7

RECENT PATENTS ON CARDIOVASCULAR DRUG DISCOVERY

publishes review and research articles, drug clinical trial studies and guest edited thematic issues on recent patents in the field of cardiovascular drug discovery e.g. on novel bioactive compounds, analogs & targets. A selection of important and recent patents on cardiovascular drug discovery is also included in the journal. The journal is essential reading for all researchers involved in cardiovascular drug design and discovery. The journal also covers recent research (where patents have been registered) in fast emerging therapeutic areas/targets & therapeutic agents related to cardiovascular drug discovery.

Medicine Journals

RECENT PATENTS ON FOOD, NUTRITION & AGRICULTURE

publishes review and research articles, and guest edited thematic issues on recent patents in all fields of food science & technology, nutrition and agricultural science & technology. A selection of important and recent patents in the areas covered is also included in the journal. The journal is essential reading for all researchers involved in food, nutrition and agricultural sciences and technology. The journal also covers recent research (where patents have been registered) in fast emerging technologies related to food additives, micro & macro-molecular food supplements, edible alternatives, food technology, nutraceuticals, healthy diet, nutritional value, calorie intake, malnutrition & related diseases, plant derivatives, agricultural technology and products, crop improvement and safety issues related to food, nutrition & agriculture.

Engineering & Technology

RECENT PATENTS ON MECHANICAL ENGINEERING

publishes review and research articles, and guest edited thematic issues on recent patents on the field of mechanical engineering. A selection of important and recent patents on mechanical engineering is also included in the journal. The journal is essential reading for all researchers involved in mechanical engineering. The journal also covers recent research (where patents have been registered) in fast emerging analytical methods, designs, manufacturing and analysis of automobiles, aircrafts, manufacturing plants, industrial instruments, machines, heating and cooling systems and processes involved and related to mechanical engineering.

RECENT PATENTS ON MATERIALS SCIENCE

publishes review and research articles, and guest edited thematic issues on recent patents in all areas of materials science. A selection of important and recent patents on materials science is also included in the journal. The journal is essential reading for all researchers involved in materials science. The journal also covers recent research (where patents have been registered) in fast emerging areas of materials science, biomaterials, biological materials, magnetic materials, medical implant materials, nanomaterials, ceramics, plastics, polymers, semi-conductors, coatings, composites, paper, wood, textile, methods, design and techniques.

RECENT PATENTS ON BIOMARKERS

publishes review and research articles, and guest edited thematic issues on important recent patents on biomarkers. The coverage includes novel biomarkers in basic, medical, environmental, and pharmaceutical research. A selection of important and recent patents on biomarkers is also included in the journal. The journal is essential reading for all researchers involved in biomarker research and discovery. The journal also covers recent research (where patents have been registered) in fast emerging patent biomarker applications; discovery and validation are covered for drug discovery, clinical development and molecular diagnostics.

RECENT PATENTS ON CATALYSIS

publishes review, research articles and guest edited thematic issues on recent patents in the field of catalysis. The journal aims to provide recent patent information in all areas of catalysis science, including heterogeneous, homogeneous catalysis, synthesis and properties of new catalysts including synthesis and catalytic function of novel inorganic solids and complexes, studies that relate catalytic function to fundamental chemical processes in metal complexes and at surfaces, novel concepts in surface chemistry. A selection of important and recent patents on catalysis is also included in the journal. The journal is essential reading for all academic and industrial researchers, including IP authorities who wish to be kept informed about important patent breakthroughs in catalysis science and technology.
