

Tentative Outline

Special/Thematic Issue for the Journal Current Genomics

Current Genomics in Cardiovascular Research

Guest Editor: Dr. Leonardo Roever

Scope of the Thematic Issue:

Cardiovascular diseases are the main cause of death in the world, in recent years we have had important advances in the interaction between cardiovascular disease and genomics. In this Research Topic, we intend for researchers to present their results with a focus on basic, translational, and clinical investigations associated with genomics and cardiovascular disease. Experimental studies, network meta-analyses, randomized controlled trials, systematic reviews and meta-analyses, umbrella reviews, meta-epidemiologic studies, cross-sectional studies, diagnosis, treatment, management, prevention, and clinical research for early diagnosis and prognosis are welcome.

Keywords: Genomics, cardiovascular disease, experimental studies, randomized controlled trials, systematic reviews, meta-analysis, umbrella reviews.

Sub-topics:

- Genomics and stroke
- Genomics and heart failure
- Genomics and atherosclerosis
- Genomics and ectopic fat

Schedule:

- Complete Thematic issue submission deadline: **December 10, 2023**
