**Tentative Outline**

**Special Issue for Current Analytical Chemistry**

**Green Chemistry for CO\_2 Capture and Utilization**

**Guest Editors:** Dr. Mashallah Rezakazemi, Dr. Inamuddin, Dr. Suvardhan Kanchi, Dr. Mohammad Jafar Molaei

**Aims & Scopes:**

Green chemistry is of platform to decrease the use or generation of hazardous compounds such as CO\_2 in the design, preparation and applications of products. It is essential to drastically cut CO\_2 emissions to reduce global warming. Hybrid solutions will be needed to meet the target of limiting the overall increase in global temperature to below 2 °C by 2100: CO\_2 capture and utilization storage (CCU), enhanced energy efficiency, and development of renewable energies. CCU will avoid the emission of 8.2 billion tons of CO\_2 between now and 2050, representing 19% of the reduction needed. The implementation of capture technologies is therefore crucially important in terms of protecting the world’s climate…

This special issue is intended to present a novel, high quality, original research articles as well as review articles/short communication/letters focused on green chemistry for CO\_2 capture and utilization. The main purpose of this special issue is to build a platform for engineers, scientists, and practitioners around the world to present their latest advances in CO\_2 capture and utilization.

**Subtopics:**

The subtopics to be covered within this issue are listed below:

1. CO\_2 separation technologies including absorption, adsorption, or membrane gas separation and etc.
2. Development of environmentally advanced methods, synthetic techniques and processes to CO\_2 capture and conversion to value-added products
3. Design of novel, greener and safer compounds from CO\_2
4. Design, synthesis, and performance assessment of different catalysts and processes for CO\_2 conversion to value-added products;
5. Computational and numerical simulation used in the CO\_2 capture and utilization;
6. Engineering of nanomaterials and processes with reduced CO\_2 footprints.

**Schedule:**

- Manuscript Submission Sept 1, 2019
- Peer Review Due: Nov 31, 2019
- Revision Due: Dec 30, 2019
- Final Manuscript Due: Jan 30, 2020
- Notification of Acceptance by the Guest Editor: Jan 30, 2020

**Contacts:**

**Guest Editors:** Dr. Mashallah Rezakazemi, Dr. Inamuddin, Dr. Suvardhan Kanchi

**Affiliation:** Shahrood University of Technology, Shahrood, Iran, King Abdulaziz University, Jeddah, Saudi Arabia, Durban University of Technology, Durban, South Africa, Shahrood University of Technology, Shahrood, Iran,

**Emails:**

Dr. Mashallah Rezakazemi: mashalah.rezakazemi@gmail.com
Dr. Inamuddin: inamuddin@zhcet.ac.in
Dr. Suvardhan Kanchi: ksuvardhan@gmail.com
Dr. Mohammad Jafar Molaei: m.molaei@shahroodut.ac.ir
