

Tentative Outline

Special Thematic Issue for Current Drugs Metabolism

Title of the thematic issue: New Therapeutic Molecules and Their Metabolism In Gastroenterology

Guest Editors:

Dr. Gianluca Ianiro, MD, Rome, Italy

Dr. Marcello Maida, MD, Caltanissetta, Italy

Dr. Radislav Nakov, MD, PhD, Sofia, Bulgaria

Aims & Scope:

Gastroenterology is an ever improving field. It is essential to the gastroenterologists, hepatologists and endoscopist to keep up-to-dated to the new therapeutic molecules. In this thematic issue we aim to discuss about the recent therapeutic enhancements of digestive diseases, their metabolism and compare them to the standard management that are available for everyday practice.

6-8 Keywords: hepatitis C, IBD, endoscopy, microbiota, HCC, Helicobacter pylori, cholangioscopy

Subtopics:

The subtopics to be covered within this issue are listed below:

1. JAK inhibition as a therapeutic strategy for inflammatory bowel diseases
2. Metabolism of Direct-acting Antiviral Agents (DAAs) in Hepatitis C therapy
3. Immunotherapies and their metabolism in hepatocellular carcinoma
4. Role of genetic polymorphisms of Cytochrome P450 Enzymes in Pantoprazole metabolism and Helicobacter pylori eradication
5. Current advances in drug delivery systems for capsule endoscopy
6. Chemical transformation of xenobiotics by gut microbiota
7. New very-low volume preparation for colonoscopy
8. Drug-induced bile duct injury
9. Drug induced cutaneous manifestations due to treatment of gastrointestinal disorders

Schedule:

- ✧ Manuscript submission deadline: 10/11/2019
- ✧ Peer Review Due: 08/12/2019
- ✧ Revision Due: 20/12/2019
- ✧ Announcement of acceptance by the Guest Editors: 29/12/2019
- ✧ Final manuscripts due: 07/01/2020
