NEW THERAPEUTIC OPTIONS FOR ANXIETY AND MOOD DISORDERS

Aims & Scope:

Anxiety and mood disorders, as groups of psychiatric disorders, are the most common mental illnesses in the world. With the recent advances in the understanding the neurobiological mechanisms involved in anxiety disorders and depression, new treatments have been espoused. Understanding of the mechanisms involved in these conditions has led to the development of successful therapies, and novel tools to characterize these clinical conditions and provide better care to patients. We invite investigators to contribute original research articles as well as review articles that will stimulate the continuing efforts to understand the neurobiological mechanisms of those conditions. We are particularly interested in articles describing the new therapeutic options for treating social anxiety disorder, generalized anxiety disorder, post-traumatic stress disorder, obsessive compulsive disorder, panic disorder, depression and bipolar disorder.

Keywords

Anxiety, Mood, Depression, Drugs, Targets

Subtopics

- Psychopharmacology and Mood Disorders
- Neuroimaging in Anxiety Disorders
- Smoking and Panic Disorder
- Transcranial Magnetic Stimulation to Treat Mood Disorders
- Animal Models and Psychopharmacology in Mood and Anxiety Disorders
- Transcranial Magnetic Stimulation to Treat Depression
- Brain Stimulation in Mood and Anxiety Disorders
- Transcranial Magnetic Stimulation and animal models of anxiety
- Psychopharmacology and Bipolar Disorder
- Neuroimaging and Specific Phobia
- Animal Models and Neurogenesis in Mood and Anxiety Disorders
- Therapeutic interventions in Panic Disorder
- Panic Disorder and Coronary Artery Disease
- Deep Brain Stimulation in Mood and Anxiety Disorders
- Recognizing Emotion from Facial Expressions in Panic Disorder: Neurobiological Mechanisms and Therapeutic Interventions
- Transcranial Magnetic Stimulation and animal models of depression
- Effects of Exercise in Mood and Anxiety Disorders

**Schedule:**

Manuscript Submission Deadline: October 2012

Peer Review Due: November 2012

Revision Due: December 2012

Notification of Acceptance by the Guest Editor: January 2013

Final Manuscripts Due: January 2013
