Title of thematic issue: “Menopause and its cardiometabolic consequences: Current perspectives”

Guest Editor: Dr. Panagiotis Anagnostis
Co-editors: Prof. Dimtirios G. Goulis, Dr. Stavroula A. Paschou

Aims & Scope: This issue aims to provide a comprehensive overview and current knowledge regarding the association between menopause and cardiovascular risk, with special report on menopausal hormone therapy (MHT, risks and benefits). This issue also covers special topics, such as premature ovarian insufficiency, peri-menopause, calcium and vitamin D supplementation, non-MHT regimen and non-alcoholic fatty liver disease.

Keywords: menopause, cardiovascular risk, peri-menopause, premature ovarian failure, hormone replacement therapy, fatty liver disease, metabolic syndrome

Subtopics:
The subtopics to be covered within this issue are listed below:

Section 1: Premature ovarian failure
2. Premature ovarian failure and long-term health consequences
3. Androgen replacement therapy in premature ovarian failure

Section 2: Peri-menopause
4. Cardiovascular risk in perimenopausal women
5. Early menopause and diabetes risk

Section 3: Menopause
6. Metabolic syndrome and menopause (or ovarian aging and cardiometabolic disease)
7. HRT and cardiovascular risk

Section 4: Special issues
8. Calcium and vitamin D supplementation. Myths and realities
9. Non-HRT regimens. Is there any effect on cardiovascular risk?
10. Cardiovascular risk in women with a history of PCOS
11. Non-alcoholic fatty liver disease and menopause

Schedule:
- Manuscript submission deadline: 15/4/2019
- Peer Review Due: 31/5/2019
- Revision Due: 30/6/2019
- Announcement of acceptance by the Guest Editors: 1-30/6/2019
- Final manuscripts due: 31/7/2019
