Tentative Outline
“Special Issue for Drug Metabolism Letters”

Guest Editor(s):

TITLE OF THE HOT TOPIC ISSUE
Neurodegenerative disorders and therapeutic intervention

Aims & Scope:
The aim of special issue is to welcome articles from multifarious therapeutic strategies employed to treat the neurodegenerative disorders. The issue mainly focuses on multifarious drugs and drug delivery systems designed to overcome issues such as passing through the blood brain barrier etc. The multidimensional theranostic approach of nanoparticles to overcome the challenges in drug delivery and drug induced toxicity are also welcome.

Key words: (at least 5 keywords)
Neurodegenerative disorders, Drugs, Drug delivery systems, Blood brain barrier, Nanoparticles

Subtopics: (minimum 6 topics or paper titles)
- Challenges in passing through blood brain barrier
- Drugs and low molecular weight compounds
- Drug delivery systems to treat Neurodegenerative disorders
- Theranostic approach of nanoparticles
- Tissue Engineering approach to overcome neurodegenerative disorders

Contributors:
- Sarika-singh
- Othman Ghribi
- Himansu Shekahar Nanda
• Ravi shukla
• Rakwal Randeep

Schedule:

Manuscript submission deadline: December 31, 2016

Peer Review Due: January 31, 2017

Revision Due: February 28, 2017

Notification of acceptance by the Guest Editor: March 15, 2017

Final manuscripts due: March 31, 2017

Final date of Submission of Special issue: March 31, 2017
