Tentative Outline

Special Issue for Recent Patents on Nanomedicine

Guest Editor(s): Yoshiaki Machida, Yoshinori Kato

TITLE: Nanopharmaceutics for Patient Care

Aims & Scope: Nanotechnology has contributed to the development of drugs, diagnostic agents, and therapeutic/diagnostic devices. Such nanopharmaceutical entities help to improve quality of life of patients. Regardless of basic or applied researches, patient care is of utmost importance as medical and pharmaceutical researchers. This thematic issue deals with agents/devices that benefit from nanotechnology. The aim of the issue is to show how much nanopharmaceutics is involved in current patient care, and to promote this line of research for future patient care. We envision that this thematic issue will create an opportunity to invest time and effort in potential inventions of patient-oriented nanopharmaceutics.

Key words: Nanomedicine; Nanodevices; Pharmacy; Pharmaceutical sciences; Chronic diseases; Nanotechnology

Subtopics: Diseases include Cancer, Diabetes, Heart disease, Stroke, Asthma, etc.

Schedule:

Manuscript submission deadline: August 1st, 2015
Peer Review Due: September 15th, 2015
Revision Due: November 1st, 2015
Notification of acceptance by the Guest Editor: December 1st, 2015
Final manuscripts due: January 1st, 2016
